(54) Title: SYSTEMS AND METHODS OF SAMPLE PROCESSING AND TEMPERATURE CONTROL

(57) Abstract: Systems and methods of sample processing and temperature control are disclosed. Specifically, the present invention provides temperature control in relation to sample processing systems and methods of processing samples. Some embodiments provides temperature control for sample carriers and processing materials, such as reagents. Corresponding systems and devices are disclosed, including sample processing systems (1) (Fig. 10), sample carrier temperature regulation systems, reagent temperature regulation systems, sample processing control systems, and temperature regulation devices. The present invention in particular applicability to the fields of immunohistochemistry, in-situ hybridization, fluorescent in-situ hybridization, special staining, such as special staining of histological samples, microarray sample processing, and cytology, as well as other chemical and biological applications.

Continuation of Box I Reason 2:	
Applicant's claim 5 is unclear to the point that no reasonable meaning can be derive	ed from the language. Reference is made to the
method of claim 1; however, reference to a particular step is omitted. Instead, claim	m 5 is directed to the step of corresponding to at least
one temperature tolerance. It is not clear what the step of corresponding was mean	it to refer to, but additionally, it is not clear what was
intended by "at least one temperature tolerance." It is not clear what is tolerating the	he temperature. Therefore, no discernible meaning
can be withdrawn.
